

Final Report – Achievement of Assignment Requirements

Description of full achievement	N	P	M	F	Comments
Summary identifies form, function, and user(s) via Opportunity Statement, and how users' needs are addressed; includes CAD & prototype visuals with labels & annotations	0	4	6	8	
Key design changes and future improvements are reasonable and justified, including: - material type for each component - 3 Ecodesign Strategy Wheel strategies, including benefits & consequences of each strategy	0	3	4	5	
Broader impacts include consideration of public health, safety, welfare, global & cultural factors, and Triple Bottom Line. Both benefits and risks & trade-offs are considered	0	4	6	8	
[Appx 1] Stakeholders' influence on design features is clear Research logically supports design features, properly cited (Assumptions are appropriate if included) Design Specs are fully defined, justified, and relevant - Product performance is indicated for each design spec	0	6	8	10	
[Appx 2] Test Plan is complete and effectively supports the design process, including a chart and a justified design decision	0	1	2		
[Appx 3] Design Details: CAD drawings follow technical standards and are sufficiently detailed & properly labeled, annotated, and dimensioned - Assembly drawing includes bill of materials - Cura screenshots and Wiring diagrams included if applicable	0	3	4	5	
[Appx 4] Budget Tracker are complete, all items required for demonstration prototype are identified appropriately	0	1	2		
[Appx 5] Project Gantt Chart is complete, including due dates, sub-tasks, and individual responsibilities	0	1	2		
Writing is clear and concise; grammar and spelling mistakes are minimal Format is appropriate for a technical report, including captioned images, charts, and tables References are appropriately formatted with in-text citations Individual Contributions are identified	0	3	4	5	
[Entire Report] Cohesive Design Process is followed to produce a well-engineered solution > <i>Design is demonstrated to effectively address the opportunity statement</i>	0	6	8	10
